

SUTS INFORMATION BULLETIN

No: 2020-2

Data: February 10, 2020

SUBJECT: DADS 2009 Report Update

The DADS2009 Gateway Referral for Services Intake Tracking_v4 report has been updated. The updates are as follows:

1. The drop-down selection box was replaced with push box. This will allow for selection of more than one location at a time.

The screenshot shows a dialog box titled "Enter Parameter Values" with a close button (X) in the top right corner. The dialog is divided into three main sections:

- Enter Screening Start Date:** Labeled "ScreeningStartDate", it contains a text input field and a calendar icon.
- Enter Screening End Date:** Labeled "ScreeningEndDate", it contains a text input field and a calendar icon.
- Enter ReferredTo:** Labeled "ReferredTo", it contains:
 - An "Available Values" list box with the following items: AACI-YSOC-OP, Advent-OP, Advent-RES, Advent-YSOC-OP, Assessment Incomplete, CADS RES, Call back, and Central T/R OP.
 - Two arrow buttons: a single right-pointing arrow (>) and a double right-pointing arrow (>>).
 - A "Selected Values" list box, which is currently empty.
 - An "Enter a Value:" text input field with a single right-pointing arrow (>) button.
 - "Remove" and "Remove All" buttons.

At the bottom right of the dialog, there are "OK" and "Cancel" buttons.

2. The client name was added. The Disposition of the Show Date from Section E. Referral Disposition was also added. This will help make sure all referrals are resolved if client does not get admitted to the program.
